Ø Cherry Add Cherry to Your Website

Use this guide to add a branded Cherry page to your existing website.

Set your branding

In your Partner Portal, navigate to Marketing > **Web Resources**. In the **Your Cherry Webpage** section, set your brand color and choose your preferred font. Preview your page to make sure everything looks right, then **save your settings**.

2

Copy your script

Below brand settings, you'll see your web script. Click the **Copy Script** button to copy your script for the next step.

Add a new page & paste your script

Log into your website provider and create a new page. Title the new page "**Payment Plans**" and add it to your main navigation

menu. On this new page, add an **HTML web element** and paste in the web script you copied from the Cherry partner portal. Click Save or Update and publish your website. Your Cherry page is now live! Don't worry about maintaining the page, Cherry will handle it from here.

(+)	Add to Site	Q Search ? X	Site Menu + Add	Add to Site	Q Search ? X
B A	Strip Page Text Image	Site page Add a page to your website and customize it Image Image	Strip POPULAR Page Popular Embeds Text Image Image VIDEO Button Single Video Players	Popular Embeds (i)	
•••	Button Gallery Decorative	Dashboard page Create a custom back office for your site admins.	Dental & Ortho Vision Care	Gallery ADVANCED ADVANCED Interactive Marketing Tools Box Velo Dev Mode	Www Display an external website in a window on your site. Learn more
<i>▶</i> ⊞ (1)	Box List Video & Music Menu & Anchor Social		Payment Plans Done Testimonials About Us Book Now	List ANIMATIONS Video & Music Lottie Embeds Social Contact & Forms Embed Code	Custom element Display custom elements using snippets of code. Learn more Single Video Players

Your script will only work when embedded in this element. Depending on what platform you use to build your website, it may be called something different. Look for "add a script" or "embed custom HTML."
